

Athena X-ray Orders Compendium Description

In order to build the compendium for our facility, the Order Type, Display Name, Paper Order Code, and Order Code, and Foreign Namespace ID are needed.

Facility ▲	Facility Type	Order Type	Display Name	Orderable	Paper Order Code	Order Code	Foreign Namespace ID
PHOEBE PUTNEY IMAGE ORDERS	Imaging	XR, SKULL, LESS THAN 4 VIEW	XR SKULL <4V	Yes	70250	XRSKULLLM	SKULLLM.RAD

The **Order Type** field helps map the results to orders, populate questions on the provider's order screen that are specific for that order type, and is part of the mapping process for CPT codes as well.

Facility ▲	Facility Type	Order Type	Display Name	Orderable	Paper Order Code	Order Code	Foreign Namespace ID
PHOEBE PUTNEY IMAGE ORDERS	Imaging	XR, SKULL, LESS THAN 4 VIEW	XR SKULL <4V	Yes	70250	XRSKULLLM	SKULLLM.RAD

The **Display Name** field is what the ordering provider sees in a dropdown menu when he/she is looking for an order.

PHOEBE PUTNEY IMAGE ORDERS	Imaging	XR, SKULL, LESS THAN 4 VIEW	XR SKULL <4V	Yes	70250	XRSKULLLM	SKULLLM.RAD

The **Paper Order Code** field gets printed on a paper order form but, since we are not going to be using paper in the future, this for referencing CPT code mappings. This can also be used as search in the provider's dropdown menu when placing an order.

PHOEBE PUTNEY IMAGE ORDERS	Imaging	XR, SKULL, LESS THAN 4 VIEW	XR SKULL <4V	Yes	70250	XRSKULLLM	SKULLLM.RAD

The **Order Code** is the Meditech result mnemonic in an ORU message that ties the result to the order based off the ORM Foreign Namespace ID field.

The **Foreign Namespace ID** field is a unique Meditech mnemonic sent in the ORM from Athena so that Meditech will accept and map to the appropriate order and is a key component that ties the results back to the order.
