Changes Made Descriptions

- The original data in segment OBR4.1 (TMJBIL.RAD), was the Meditech mnemonic in the Athena compendium **Foreign Namespace ID** and was changed to what is in the Athena compendium **Order Type** field (XRTMJBIL).
- The data that was originally in segment OBR4.1 was moved to OBR24 where there was no data initially.
- There was originally no second NTE segment. We added the additional NTE segment which contains the “Supervising Provider Signature” field that is located on the provider’s orders page
